

I have been working with FSG Tableware Ltd since 2016 and always found them to be supportive, efficient and extremely Professional

Eco to go reusable boxes and cups were chosen by the University for their Sustainability Credentials which are consistent with UoB's commitment to reduce the environmental impact whilst maintaining economic viability.

In year 1 (2016/2017) – 135,625 disposable containers were replaced with reusable boxes with a total saving of £17,404.

Eco-box is a self-supporting initiative. £21k a year was being spent on single-use food containers, which was an unnecessary expenditure resulting in thousands of containers going to non-recyclable waste.

UoB now plan to roll out the Eco box across the whole of campus – to over 30,000 students in September 2018

With the success of the Eco box, UoB wanted to expand their environmental efforts by extending their reuse policy to coffee cups. Eco to go cups were selected because they are the most environmentally friendly reusable cup available in the market, made from agricultural waste the cups are 100% natural, non-toxic and biodegrade in compost turning into fertiliser.

UoB completely sold out of the 5000 cups within 3 ½ months. Which was an amazing and unexpected result, FSG Tableware Ltd were then challenged to produce and import a further 5'000 cups at very short notice and they certainly rose to the challenge, Lynn and her team pulled out all the stops and made this happen

UoB are completely happy with FSG Tableware Ltd services and I am happy to provide this reference and can say hand on heart the products are fantastic and the service is professional

Sincerely

Mrs Karen Morrey

Hub Catering Operations Manager (HAS)
